

EXCURSION TO IMC FH KREMS

On 24 March 2017 we, the classes 5AK and 5CK, went on a school trip to the FH in Krems because we wanted to get a taste of what a student's life might be like at a university. Not only were we welcomed extremely nicely, we even got a chance at participating in a panel discussion about self-employment.

What did the programme look like?

At first we visited the Campus at Piaristengasse, which was adapted to a more modern version so it would be suitable for students to study. There we got a brief presentation about the University of Applied Sciences and about their offered programmes.

Afterwards a lecturer guided us through the old building and the most memorable moment was the cellar of it, where classes are also held. After the tour we got to the new campus of the institute. We were divided into two groups. Each group was able to be a part of a panel discussion as well as having the opportunity to try out the VR Glasses. We were taught about the virtual reality itself and how companies can use it for their marketing strategies. With those glasses you feel like you're in a complete different world. I got the chance to try them out myself and I didn't want to take them off, because I was so consumed into the world. It is incredible, how technology nowadays can look like. The trip was a real success, because we were provided with exclusive glimpses behind the scenes of a student's daily life at an FH so at this point I would like to thank our English teachers **Mr. Pekar** and **Mrs. Amaya Diaz** for organising this amazing trip for us.

Eva Osmanova, 5AK
